

KHOSLA TOOLS & EQUIPMENT

Shear Blade Machine

Khosla Tools manufactures Shear Blades up to 2000 mm length. Shear Blades are manufactured for both hot and cold operations and are available to shear foils as thin as .2 mm thick and billets as thick as 100 mm. Khosla Tools also offers chipper knives for chipping operations in all types of paper and wood industries. Selection of raw material, processing and fabrication of Shear blades and knives are carried out in sophisticated plants. Great care is taken to ensure that the knives have required hardness, compression strength, wear resistance, longer cutting edge life, toughness and shock resistance. Special heat treatment is employed to give differential hardness to knives, whenever required.

Slitting line tooling

Khosla Tools offers a complete range of Slitting Line Tooling confirming to international standards. Rotary Slitting Knives, Metal Slitting knives, Spacers, Overarm Separators Discs and other precision tools are manufactured from finest alloy steel. Heat treated to close tolerances and precision ground to perfect squareness, Khosla Tools manufacture slitting line tooling in three grades of tolerances i.e. Standard Precision, Extra Precision. Standard for slitting strip above 1mm thickness and Extra precision grade for foils up to .2mm thickness. Khosla Tools can manufacture Slitting Line tooling up to 500mm diameter.

Specialized Flat Knives

Khosla Tools also manufactures Crop Shear, Bar Shear, Bow Tie Shear Blades, Scrap Choppers, Chipper Knives, Wearing Plates, Cold Shear Blades, Hot Shear Blades, etc.

Chipper Knives

KHOSLA chipper, flaker and waferizer knives, chipper Components and wear parts are used worldwide in the pulp & paper, plywood, chipping and sawmill industries. Khosla's modern factory supply knives, anvils, counter knives, knife clamps, knife holders, wear parts and other components for any chipper or faker make and model.

Paper & Pulp

Available in a host of shapes, size, varieties for unmatched performance. Ring type, cup type & segmental for heavy duty operation. Compatible with most popular Indian or imported sheet cutters & rewinders. Special tool & alloy steel construction, through hardened for optimum wear & long life. Numerous shapes & size to suit all varieties of paper, foils, films etc. Perfect dimensional stability & precision tolerances.

Plastic Packing Knives

Corrugation & Plastic Knives, Plastic Packaging, Granulators, Paper Conversion. Board Cutters, rotary, eccentric slotter, chain slotter Corrugation sheet cutter cut off and punch cut blade. O.E. supplier to most machine manufacturers. High resistance to wear and quality high edge retention. Careful selection of best suited alloy steel. Low setup time and consistently clean cutting. Precision ground and quality heat treated. Most sizes available ex-stock or short delivery period.

Miscellaneous

Ledger Blades & Circular Slitter/Carpet clippers (Textiles)
Bias Cutter, Banners & Breaker Blades (Rubber)
Leather Skiving & Fiberizers (Leather)
Recycling Skiving & Fiberizers (Plastic)

Any other Tailor made blades can be manufactured according to your ever lasting requirements.
